

Mechanical Sub-Assemblies

AST offers precise [mechanical sub-assemblies](#) in addition to regular bearings. We specialise in manufacturing rotary assemblies with high-precision bearings and components.

Mechanical Sub-Assemblies:-

- Tight tolerance machining, castings, and injection moulding.
- The component materials are polymers and metals (in various alloys).
- Specialty substances and lubricants.
- Protective Coatings

AST Mechanical Sub-Assembly Services:-

- Having expertise in bearing engineering (CAD drawings provided upon request). Hired assembly.
- Environments for testing and assembly for classes 10,000 and 100.
- Testing and product inspection.
- Superior bearing laboratory.
